

## Tumors of the Central Nervous System

Filesize: 7.47 MB

### ***Reviews***

*Extremely helpful to all of group of individuals. It really is loaded with knowledge and wisdom Its been designed in an extremely basic way and is particularly simply after i finished reading through this ebook where actually altered me, affect the way i believe.*

*(Lily Ryan)*

## TUMORS OF THE CENTRAL NERVOUS SYSTEM

To get **Tumors of the Central Nervous System** eBook, you should follow the hyperlink listed below and download the ebook or get access to other information which are in conjunction with TUMORS OF THE CENTRAL NERVOUS SYSTEM book.

Book Condition: New. Publisher/Verlag: Springer Netherlands | As in the case of its eleven predecessors in the series Tumors of the Central Nervous System, this volume is distinguished for its thorough approach, its roster of 92 distinguished contributors representing 11 different countries and its detailed examination of leading-edge technology and methods. Volume 12: Molecular Mechanisms, Children's Cancer, Treatments, and Radiosurgery offers a comprehensive review of the diagnosis, therapy and prognosis of brain and spinal cord tumors. Coverage extends to a large number of tumor types, including neuroblastoma, medulloblastoma, meningioma and chordoma. Molecular profiling of brain tumors to select appropriate therapy in clinical trials of brain tumors is discussed in detail, as is the classification/diagnosis of brain tumors based on function analysis. CDK6 as the molecular regulator of neuronal differentiation in the adult brain, and the role of aquaporins in human brain tumor growth are explained. Discussion also includes tumors affecting children, including neuroblastoma and medulloblastoma. A full chapter is devoted to the role of molecular genetic alterations in medulloblastoma, and another examines survival differences between children and adults with medulloblastoma. The use of various types of imaging methods to diagnose brain tumors is explained. In-depth discussion of treatment options includes stereotactic radiosurgery, endoscopic neurosurgery, electrochemotherapy, transsphenoidal surgery, focal ablation, whole brain radiation therapy and craniotomy. | Preface. I Molecular mechanisms.- Classification/diagnosis of brain tumors using discriminate function analysis.- Neuronal differentiation in the adult brain: cdk6 as the molecular regulator.- Prolactinomas: role of vegf, fgf-2 and cd31.- Human brain tumor growth: role of aquaporins.- Molecular and functional characterization of human adipocytes.- II Children's cancer.- Inhibition of neuroblastoma progression by targeting Lymphangiogenesis: role of an endogenous soluble splice-variant of vegfr-2.- Hyperinsulinemia tends to induce growth without growth hormone in children with brain tumors after neurosurgery.- Childhood brain tumors: proton beam therapy.- Pathogenesis...
