## Animal Assisted Therapy and the Therapeutic Alliance in the Treatment of Substance Dependence: Using Animal Assisted Therapy with Drug Abuse Treatment Groups

By Dr Martin Cortez Wesley

Createspace, United States, 2012. Paperback. Book Condition: New. 226 x 150 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This research study evaluated the effect of animal assisted therapy (AAT) on the therapeutic alliance with an adult residential substance abuse population in group therapy. The question of whether a trained therapy animal can enhance the therapeutic alliance was recently posed by Fine and Mio (2006). In their call for additional research, they suggested that the gold standard for research of this type is to have a random assignment to an AAT format and a traditional therapy format and then to determine which format led to a better therapeutic outcome (Fine Mio, p. 517). This quantitative study followed these recommendations by using randomized populations and controlled conditions to establish the effects of chosen variables that influence outcome. The study made comparisons of the mean differences between groups with and without the therapy dog. A one-way analysis of variance (ANOVA) was used to compute the mean differences and test the hypothesis for the efficacy of AAT. The results of the study indicate that the therapeutic alliance is enhanced with the addition of a therapy dog. The addition of a...
