RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 196 pages. Original publisher: Washington, D. C. : The Office, 1987. OCLC Number: (OCoLC)17450968 Subject: Engineering -- Research -- United States. Excerpt: . . . However, despite the economic importance of public works, and associations, and corporations. the magnitude of annual investment in construction, operations, and maintenance, R and D expenditures on construction technologies and materials are relatively small. Total Federal R and D for infrastructure was 103 million in FY85, or roughly 0.3 percent of total new infrastructure construction ( see table 1-1 ). Of this amount, OTA estimates that Federal agencies spent around 36 million on R and D for infrastructure materials; 14 million on incremental and advanced improvements in construction technologies and methods; and the remainder to improve design, evaluations, needs analyses, management systems, feasibility studies, information dissemination, etc. The types of, and levels of funding for, Federally-sponsored R and D programs related to public works vary widely ( see tables 1-2 and 1-3 ). Domestic public works projects tend to borrow technologies and materials developed for other applications ( e. g. , fiber-reinforced concrete ). Federal research agendas reflect this in their emphases on adapting available products for specific public works applications, on analyses of public works capacity, and on management support. OTA found no significant Federal R and D expenditures for advanced construction technologies, or to support the design or development of alternative infrastructure systems, such as a totally new way of delivering water. Although reliable data on nonfederal R and D funding are difficult to obtain, OTA found that private sector R and D for infrastructure construction technologies and materials also is mini-Based on the figures obtained within the time constraints of this survey, OTA estimates mal. that total nonfederal materials-related...
