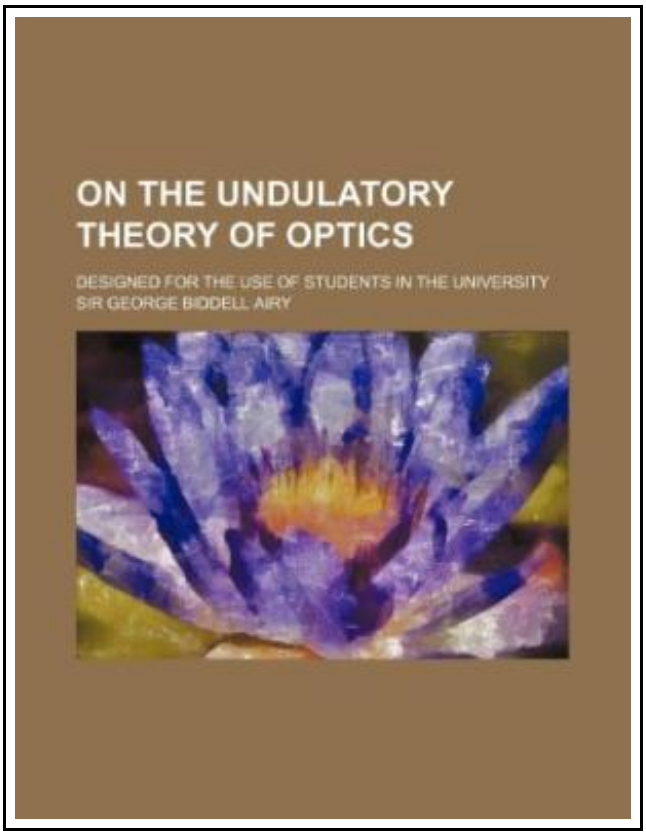
On the undulatory theory of optics designed for the use of students in the university



Filesize: 4.86 MB

Reviews

A fresh eBook with an all new standpoint. It is actually writter in simple words and phrases instead of difficult to understand. You wont sense monotony at at any moment of your own time (that's what catalogs are for relating to if you question me).

(Dr. Marcel Collins)

ON THE UNDULATORY THEORY OF OPTICS DESIGNED FOR THE USE OF STUDENTS IN THE UNIVERSITY

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 62 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866 Excerpt: . . . or if i i at the first surface 90, i i at the second surface also 90, and therefore the light reflected internally from the second surface is also polarized. -This is true in experiment. Many investigations applying to these problems are to be found in the Cambridge Transactions and other Transactions, the Philosophical Magazine, and the Comptes Rendus of the French Academy. Prop. 27. Light polarized in a plane inclined by the angle a to the plane of incidence falls on the surface of a refracting medium: to find the position of the plane of polarization of the reflected light 132. The displacement of a particle of ether before incidence may be represented by in the direction making with the plane of incidence an angle (90-a): and this may be resolved into a cos a. sin (vt--a;) j perpendicular to the plane of incidence, and a sin a. sin (vt--o;) parallel to the plane of incidence. And these expressions will apply to the reflected ray, giving x the same alteration in both, and altering the coefficients in the ratios determined in (128) and (129). Hence we shall have after reflection, Displacement perpendicular to the plane of incidence Displacement parallel to the plane of incidence tan (i--i). (27r, -asinj r-r, Bin---vt--x). tan i 1) (J Since these are in the same ratio whatever be the value of x, it follows that the displacement compounded of these is entirely in one plane, and therefore the reflected...
