

Chemistry Pamphlets Volume 2

By Books Group

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: .of dissolving in mercury as a salt does in water, i. e. breaking down to the molecule, the mercury disintegrates the amalgam to nothing smaller than the crystal unit, so that when the mercury is squeezed through chamois leather the crystal units which have collected together in masses of sufficient size cannot pass through the pores of the skin, while the smaller masses and the single crystal particles are not held back; but if the mercury be forced through boxwood or material having smaller pores, more of the amalgam refuses to pass through. I append hereto an index to the literature pertaining to the subject, and although it may not be complete, I can say that I have endeavored to make it so. I give first a list of the more important references (with the titles) which deal with the subject in a more or less...
