NOVEL CHARACTERIZATION METHODS FOR MICROCRYSTALLINE SILICON: FINAL REPORT, MAY 1999-DECEMBER 2002

Novel Characterization Methods
for Microcrystalline Silicon: Final
Report, May 1999-December 2002

National Renewable Energy
Laboratory (NREL)

Bibliogov, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The work carried out under this subcontract has provided advanced characterization supporting the development of these materials for photovoltaic applications. The studies, using time-resolved optical methods and positron annihilation spectroscopy, focus on characterization of carrier processes and defect states that are important to understand, and thereby control, to optimize photovoltaic efficiency. This work advances the objectives of the...

Reviews

This pdf may be worth a read through, and much better than other. It is really basic but unexpected situations inside the 50 percent of your publication. I am delighted to let you know that this is basically the very best publication i have got read within my individual existence and can be he best pdf for ever.

-- **Linwood Reichel**

This publication is definitely worth buying. It typically is not going to price an excessive amount of. I found out this publication from my i and dad recommended this ebook to find out.
